

# DEAR NEIGHBORS

---

As part of our commitment to the community, we wish to inform you that, on Friday, November 1, 2019, we will be conducting a simulation exercise to assess the noise impact of an emergency medical transport helicopter at the future site of the California Northstate University Medical Center (CNUMC) and Teaching Hospital.

This exercise is part of the environmental review process. It will be conducted by a certified charter aircraft company and will last approximately one hour.

We are coordinating with the Elk Grove Police Department to ensure safety on the site and in the surrounding area.

Residents in the immediate vicinity of the site are being notified by mail of the upcoming simulation and the notice is posted on our website at [www.cnuhealth.com](http://www.cnuhealth.com).

Emergency helicopter transport is a critical element in delivering high-quality care when lives hang in the balance and every minute counts.
