
SECTION 17 – DUST CONTROL

17-1 GENERAL

Dust control is a year-round requirement. Dust control shall consist of applying water and/or soil binder/dust palliative to alleviate or prevent fugitive and nuisance dust resulting from the Contractor's operations, either within or outside the Work right-of-way.

Dust control shall be performed by the Contractor at any time dust, resulting from the Contractor's operations, becomes a fugitive or a nuisance or visual impediment, or as directed by the City. Failure to adequately control dust will be cause for the City to direct the Contractor to suspend operations or for the City to perform such activity with all costs to be borne by the Contractor.

Water shall be applied as provided in Section 16, "Water Used in Construction", of these Specifications.

17-2 DUST PALLIATIVE

Dust palliative shall be applied when deemed necessary by the City. Dust palliative may be used for dust control on disturbed soil areas, haul roads and staging areas. Dust palliatives are to be submitted to the City for approval prior to use and applied per manufacturer's recommendation. Costs for dust palliatives will be borne solely by Contractor.

17-3 MEASUREMENT AND PAYMENT

Full compensation for applying water and/or dust palliatives for dust control is included in the prices paid for the various items of work involved and no additional compensation will be paid.
